

ALUMINIUM MINI TOWER ERECTION GUIDE

1 First insert the pins wheels into the frames.

2 Clip two HV horizontally to the base frames as shown below, then assemble four frames to pairs and insert them in base frames. Clip the diagonal braces as the positions below.

3 Fit four connectors to the frames as the positions below.

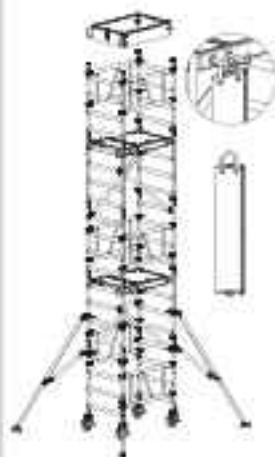

4 Place the 1st platform on the top of the second layer frames and clip another two HV horizontally to the frames as shown below.

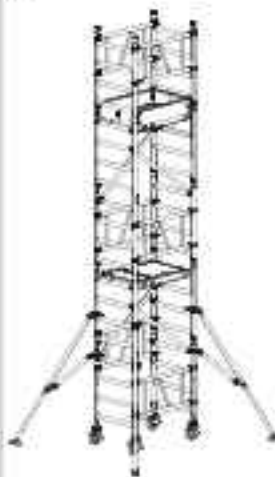

5 Pull out the tabs on both sides of the platform, and put the frames, HV vertically, outside and diagonal braces to the tabs. Repeat step 2.

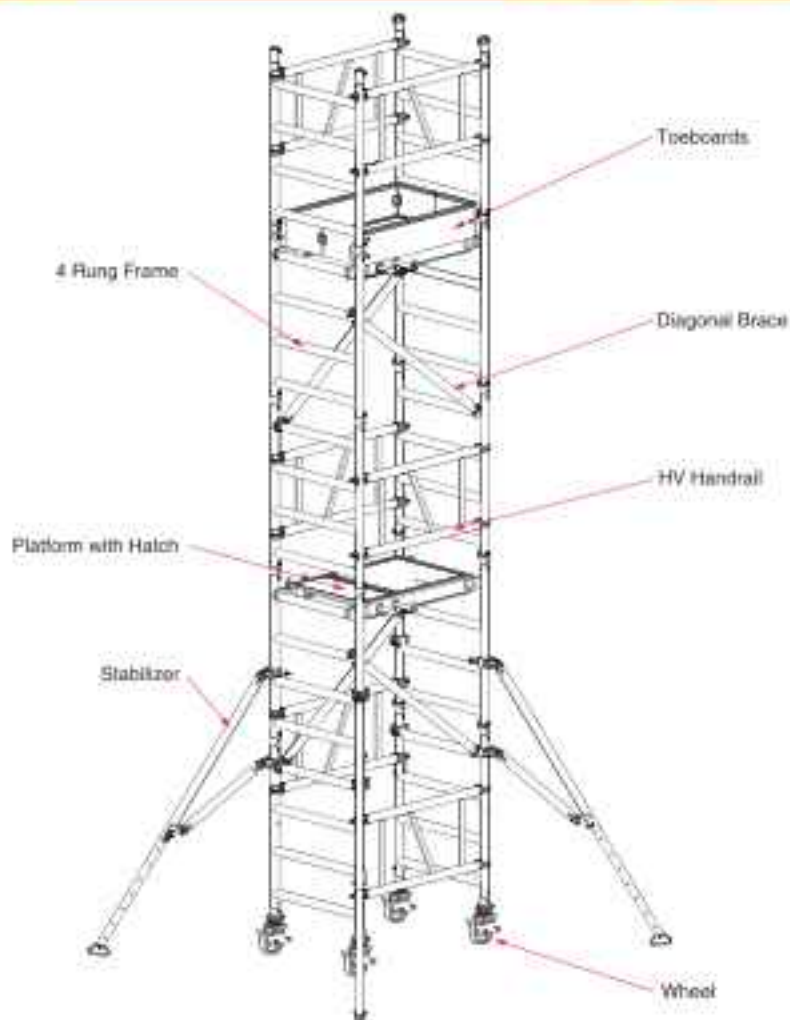

6 Set the scaffold bar fixed through the hole in the platform. In the scaffold to the top platform. Then the scaffold tower is complete.

7 The tower is now complete and ready to use.

DO NOT TAKE CHANCES!
